M58 Smart Dimming
Remote Control
Design style and
the current popular
modern minimalist
design style
for interior space
can be completely
integrated together

Extra Heavy Design

M58 Smart Dimming Remote Control

The biggest feature is heavy

Extra heavy design

allows the user to control

various devices

by rotating the M58 on the desktop

without the "slightest movement"

in any situation

Combined with the "expertly tuned"

"rotary damper", which allows

M58 to be the top-class handfeel

of "rotary control"

**M58 Smart Dimming
Remote Control's
"Angle of Inclination" is
user-friendly design
the "angle",
the handfeel of rotation
or the recognition of key symbols
is in line with the
ergonomic design**

Light 10%
room light
brightness
adjust to 10%

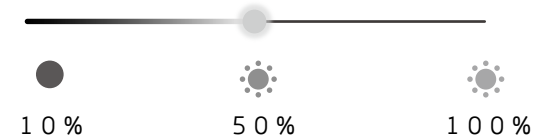

Light 50%
room light

adjust to 50%

Light 100%
room light
brightness
adjust to 100%

0-100% stepless control

Light brightness control

M58 Smart Dimming Remote Control

Adjust the brightness of

all lights in the space by rotating

Make all spotlights, strip lights, chandeliers, wall lights

Floor lamps, table lamps, footlights, buried lamps

Synchronized brighter and darker

you can also control each light individually
by rotating

M58 Smart Dimming Remote Control with four keys on the front
Up to control four combinations. There are also individual users who do not use the four-way rotation, but use the three-way rotation function with one key for scene command. Users can custom modifications by APP and choose the devices to control

One key with two functions

Select the device to control
by a tap and then by rotating
you can control the device state
For example: light brightness
opening percentage of the curtain
and the volume

Of course, you can also
"Double-tap" this key
to execute a scene command
without rotating it again
For example, start chat mode
or turn on 100% light brightness

1. Push the detachable top cover parallel to the left

No. 7 batteries

Back of the top cover

2. Open the back of the cover and replace the No. 7 batteries

M58 base

**Moorgen M58 Smart
Dimming Remote Control**
Is powered by two No. 7 batteries
Replace the batteries
every 6-12 months
